

Job title: Product Development Technician

We require a Technician to work as part of the Gill Product Development team.

Your responsibilities include resolving fit issues, organising size trials and helping to create size specification sheets. You will also be required to play a hands-on role in our testing facility by providing administrative support, maintaining product folders and through fabric/component testing.

Excellent communication skills are vital, as you will be required to work closely with the Product Developers, QC team as well as overseas manufacturers.

You will be logical and organised with good analytical skills and problem solving capability.

Pattern cutting experience would be an advantage, as would a working knowledge of Investronica software.

If you want to be part of a growing and exciting sailing industry business, please send your CV with a covering letter to:
